**HOUSTON (Jan. 27, 2020)** –RCS Electric Actuators, a division of Dresser Natural Gas Solutions (Dresser NGS), a leading provider of actuators, measurement, instrumentation and piping solutions to the natural gas distribution and transmissions markets has introduced the latest expansion to the RCS SurePowr™ actuator product line with Sure 65, a Spring -Return electric actuator to be utilized in the transit tunnel and ventilation market.

Electric actuators in high-temperature applications on ventilation dampers traditionally rely on insulation blankets to perform reliably. The RCS Sure 65 electric actuator is now available with a new, simpler, and cost-efficient “blanketless” design that eliminates the need for thermal insulation blankets in SurePowr™ actuators yet still allows for compliance with NFPA 130 and NFPA 502 standards and are capable of operation after exposure to a temperature of 250 degrees C (482 degrees F) for two hours.

The Sure 65 is the first of three SurePowr™ actuators – Sure 65, 100 and 150 – to be introduced and will eliminate the need for expensive accessories, offer reductions in price and physical size, improve access to the actuator internals, and create an improvement for tunnel ventilation systems.

Dave Evans, CEO of Dresser Natural Gas Solutions - RCS said, “The RCS SurePowr™ product offering has long been the go-to product for rugged and reliable damper actuation in transit tunnel ventilation and smoke control applications. Our American made line of Spring-Return actuators continue to provide innovative and reliable service in this challenging environment, and this latest improvement shows our commitment to constantly improving our product offerings to the many markets we have served for over 50 years.”

**About Dresser Natural Gas Solutions (NGS)**

Headquartered in Houston, Dresser NGS provides measurement, instrumentation and piping solutions to the natural gas distribution and transmission markets. Dresser NGS's capabilities extend from complete stations to the gas burner tip as well as a broad portfolio of pipeline integrity solutions. Dresser NGS has a global presence with approximately 450 employees and a sales force in over 100 countries. For more information, visit [www.dresserngs.com](http://www.dresserngs.com).

About Dresser Natural Gas Solutions RCS

Dresser Natural Gas Solutions' RCS offers a comprehensive line of quarter-turn, multi-turn, and the industry leading SurePowr series of spring-return electric actuators designed to address the most severe and demanding service requirements. RCS actuator products provide automation solutions to valve and equipment manufacturers and to end users in the commercial, industrial, marine, and power industries. Contact us today to find the actuator to fit your needs. [www.dresserngs.com/dresser-rcs-actuators](http://www.dresserngs.com/dresser-rcs-actuators)
