

Product Update Notification

MC2/IMCW2 Lid Redesign

New Top Lid Design for the Dresser MC2 and IMCW2 Gas Volume Correctors

December 2, 2019

Product Update Notifications provide information about updates, enhancements, improvements, certifications and other changes to current Dresser Meters and Instruments Products and Services. The information in these notices is intended to help you take advantage of the continuous improvements to Dresser Meters and Instruments products and services.

Product Update Overview

We have designed and tested an enhancement to the top lid design of the Dresser Micro Corrector, Models MC2 and IMCW2. The painted metal lid now features a glass viewing window which provides added protection in the most extreme environments and ensures viewing clarity for the life of the corrector. The front label has the same look and feel as the current label, however, the label itself is no longer a part of the environmental sealing of the top lid.

Additionally, the scrolling button currently located under the front label has moved to the side of the lid enclosure. The newly designed button and cover assembly meet all the necessary environmental testing criteria including a certified moisture ingress protection level of IP 66. Both changes ensure the robustness of the Micro Corrector enclosure.

Dresser IMCW2 with redesigned index cover

Product Availability

Dresser NGS will begin shipping all models of the Micro Corrector, Models IMCW2 and MC2, beginning in Q1-2020.
